Checking in at the canteen - this is how it works

How to check in using the QR code

Scan the QR code in the canteen using either the camera of your phone or a QR code reader app:
Open the app (can be downloaded from the App Store).
The camera app on your phone will open. Point your camera at the QR code so that it is positioned in the middle of the screen.

Your phone will read the QR code and display a message. Touch that message to follow the link in the QR code. Some phones will open the linked website automatically.
You will not have to make a photo of the QR code!

Enter your data on the website to which you will be taken and then click “Kontaktdaten erfassen” (“register contact details”).
Done.

You will be logged off automatically after 60 minutes.

Your data will be stored in encrypted form and will be used only for contact tracing purposes. We will only transfer your data to the health office if there is a positive case of Covid. Your data will be erased automatically at the end of the minimum data retention period.

You can assert your rights as a data subject at any time.
To do so, email us at
datenschutz@studentenwerk-wuerzburg.de.
